By direction of the Secretary of the Army, under the provisions of paragraph 203, AR 672-5-1, the Meritorious Unit Commendation is awarded to the following units of the United States Army for exceptionally meritorious achievement in the performance of outstanding services during the period indicated:

The citation reads as follows: The following Army units of the 32d Continental Air Defense Command Region:

Headquarters, 2d Region, U.S. Air Defense Command (7802)
 13th Artillery Group (AD)
 6th Missile Battalion (HAWK), 65th Artillery

 34th Signal Detachment (Communication Maintenance)

 86th Engineers Detachment (Field Maintenance)

are cited for exceptionally meritorious achievement in the performance of outstanding services in the defense of their country during the period 20 October 1962 to 1 June 1963 while conducting active aerospace defense of the continental United States. Under almost primitive field conditions the Army missile units and their supporting detachments were deployed to complete a defensive ring around southern Florida against the threat posed to the United States during the Cuban crisis. The introduction of the Army HAWK missile into the Continental Air Defense Command assured the defense against low flying aircraft from Cuba. The outstanding performance of duty by the units, both individually and collectively, contributed in great measure to the success of a highly important mission, operating under a joint command, and reflects great credit on themselves, the United States Army Air Defense Command, and the United States Army.
